

13

18. (Amended) A system for generating and posting an on-line test, comprising:

a first computer operatively coupled to the Internet, the first computer including software means for generating the test and software means for posting the test on the Internet; and

a second computer operatively coupled to the Internet, the second computer operative to allow a user to take the test and receive test results;

wherein a test-taker is required to pay to take the compiled test; and

wherein a test-maker and a proprietor of the first computer share the revenues generated by the test-taker taking the test.

14

19. (Amended) A system for generating and posting an on-line test, comprising:

B2 a host computer operatively coupled to a network backbone, the host computer including means for generating the test and means for posting the test;

a first computer operatively coupled to the host computer, the first computer being operative to generate questions for the test; and

a second computer operatively coupled to the host computer, the second computer operative to take the test;

wherein a test-taker is required to pay to take the compiled test; and

wherein a test-maker and a proprietor of the host computer share the revenues generated by the test-taker taking the test.

15

20. (Amended) A system for generating and posting an on-line test, comprising:

host means, coupled to a network backbone, for generating the test and for posting the test;

means, operatively coupled to the host means, for generating questions for the test; and

means, operatively coupled to the host means, for taking the test;

wherein a test-taker is required to pay to take the compiled test; and
